Software Developer | www.michaelshokoya.com | mayo_s@hotmail.co.uk | 07481438602

Programming - NodeJS – 5yrs

Expertise -

Express – 5yrs

React – 5yrs

Docker – 3yrs

Kubernetes – 2yrs

HTML/CSS/Javascript – 5yrs

Microservices –3yrs

Kafka – 1yr

Mongodb – 5yrs

+ More

Career Objective

Seeking a full stack software developer position where I can best utilize and challenge my existing knowledge and learn new skills whilst developing and an engineer and an individual.

Key Skills

- Ability to grasp new concepts/technologies/frameworks and implement them very quickly
- Ability to analyze , design and develop large-scale, complex client/server side web based applications
- Able to optimise code for better performance and code quality
- Ability to adapt to any working environment and connect with people instantly

EXPERIENCE

Atrice LTD — Contract *Software Developer*

February 2018 - December 2020

I was contracted on different occasions to participate on the development of multiple projects such:

1. Cloud based phone system using nodejs, postgres, socketIO, webRTC, redis and react + more
   a. I implemented a click to call feature for the chrome extension
   b. I helped integrate trello into app and implement a sms send & receive feature
   c. I handled user management features allowing users to change details and manage permissions on a administrator level
   d. I helped implement a feature to block inbound calls from selected numbers

2. A ecommerce startup working with nodejs, microservices, redis, postgres, nextjs
   a. I helped refactor the application from a monolith into a microservice based architecture
   b. I advised and contributed towards recatoring to implement the CQRS pattern
   c. I implemented parts of the users orders section of the website with react/nextjs

3. Real time text editor with voice chat with nodejs, mongodb, redis, socketIO, webRTC + more
   a. I helped with the implementation of authentication and authorization (register + login)
   b. I helped implement the save code feature which allows you to save a snapshot of the code
   c. + more

EDUCATION

University Of Bradford, UK — Bsc *Accounting & Finance*

September 2011 -May 2014

Received 2.1 Bachelor Of Science. The course taught me discipline and how to be an effective leader amongst many other things

PROJECTS

Pin Drop

https://github.com/mshokoya/Pin-drop

This application was built for tourists and travel liberated people. Its an app that pins popular tourist spots in selected cities or countries

Chop City

https://github.com/mshokoya/recipe-website

This project is a recipe website that allows people to share and find recipes

Tiny House

https://github.com/mshokoya/hotel-booking-app

This project is an airBNB clone. It allows people to book vacation rentals
